

# CASE STUDY

Praia Golfe Hotel

# Praia Golfe Hotel

The PraiaGolfe Hotel is located in the cosmopolitan and hospitable city of Espinho in front of the beach and promenade, right next to the Casino, with superb international shows and is surrounded by the best golf courses in the Porto Metropolitan Area.

Hotel with 133 rooms comfortably furnished.

This company is a place of prime stop for those visiting Northern Portugal especially the area of Espinho. So ELO, installed here a solution in order to streamline HR processes by simplifying processes and creating autonomy for employees.

“ This software allows real-time information, freedom to perform other tasks; time saving in the search and analysis of information and increased ability to allocate resources. ”

ISABEL ABELHA; CFO

# Solution and how it Works

PraiaGolfe implemented in its facilities the Elo solution Time HR nG, that it is an application that manages the attendance and punctuality of employees and automates processes in the collection and processing of information to provide calculations and queries to its users, and has as a common goal, the integration with external applications.

This solution proves to be fundamental to simplifying HR processes through automation of said processes. However this solution was further supplemented with Time HR Portal, one attendance portal with the aim of employees, managers and human resources interact with the system in order to classify movements, authorization and query data.

The use of the portal is made in order to encourage each employee to manage its own presence and it is in all cases a significant time savings for the company.

The interaction with the solution is perfectly peaceful, despite having existed the usual habituation process where some difficulties are detected, the solution was well accepted, its potential was understood and put to the test and as a consequence its use appears to be natural and simple.

## Benefits

- Reduced absenteeism rates;
- Time reduction in daily processes;
- Increased speed and ease in the process, due to the transformation of monthly processes in everyday processes;
- Increased productivity;
- Reduction of obstacles to the passage of information since it is their own employees to expose the case and to convey its request to the responsible authorities.
